

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-6. (cancelled)

7. (currently amended) A catheter for the transfer of embryos into female genital organs, comprising:

an elongated member having a first passage therethrough extending from a distal end of said catheter to a proximal end of said catheter, said passage being open at said distal end, and at its proximal end so as to be able to be connected to a syringe, and a second passage parallel to but spaced from said first passage, said second passage being closed at both ends and containing an echogenic material at the level of the open distal end of said first passage, thereby to permit visualizing the position of said open distal end in ~~[[the]]~~ an area where the transfer should took place.

8-10. (cancelled)

11. (new) The catheter according to claim 7, wherein said echogenic material is an echogenic polymer film.

12. (new) The catheter according to claim 11, wherein said echogenic polymer film is polytetrafluorethylene.

13. (new) A device, comprising:

an elongated member having a first passage therethrough extending from a distal end of a catheter to a proximal end of said catheter, said passage being open at said distal end, a second passage parallel to but spaced from said first passage, said second passage being closed at both ends and containing an echogenic material at the level of the open distal end of said first passage, thereby to permit visualizing the position of said open distal end in an area where the removal or transfer took place, and a piston at the distal end of said catheter.

14. (new) The device as claimed in claim 13, wherein said piston is made of an echogenic material.
